

REWARD FOR KRAFCENKO
WILL AGGREGATE \$13,000

"Money, and Money Alone, Will Get Him," Said the Mayor—Mrs. Krafcenko Overjoyed Upon Hearing News of Husband's Escape.—Lives in Cabin With Little Son and Father-in-Law

Winnipeg, Jan. 15.—The Board of Control, decided to add \$6000 to the \$9000 already offered for the capture and conviction of John Krafenko, making \$15,000 reward in all and the recommendation to this effect will undoubtedly be endorsed by the city council.

Money and men alone, will get the job done," Mayor Deacon, said. "The city has to be protected. The honor of the city is at stake." A busy time is expected when the police commission will meet again. The result of the investigation into the jail delivery may be made public at that time.

Description of John Krafencko
The description given by the police of John Krafencko, for whom capture rewards aggregating \$15,000 have been offered. Krafencko escaped from the police station in Winnipeg, while on duty, on the 10th inst.

English; speaks English. He always wears a beard. Has a mustache. Is going under the name of Earl Stoddard, some years ago while traveling with a circus. Good shot. In attempting to make arrests never takes no chances."

Mrs. Krafencko Overjoyed
Port William, Ont., Jan. 13.—Mrs. John Krafencko evinced much pleasure today when she learned that her husband, at the title station of Graham, on the G.T.P. north of here, of the escape of her husband from the Central police station in Winnipeg. With her little

Bank of Montreal at Plum Cove, Manitoba, and the murder of the manager, H. M. Arnold on Dec. 3, 1913.

Height, 5 feet six and a half inches; weight, 140 lbs.; eyes, blue; hair, brown; complexion, fair; scars, none.

He is a married man, and resides in a hotel cabin at Graham, Ont., where his wife last year was engaged as a car repairer, and at different times as an interpreter by the provincial police.

MEXICAN GOVERNMENT
BOYS PACKING PLANT

DIXIE JUBILEE SINGERS
MAKE GREAT HIT

Price Varies from \$4,500,000 to \$6,000,000—Must Sell Bonds

Mexico City, Jan. 15—Mexico has bought a packing house and has arranged to raise funds for the payment of war material already contracted for and for

The Dixie Jubilee Concert company, which gave an entertainment at the Gem Theatre Tuesday night, was by no means a disappointment to the Mexican people. A good house greeted the company and the splendid singing of old southern melodies seemed to meet the general approval of the audience.

other purposes. This is provided for by a presidential decree authorising the issue of bonds of the Interior public debt at six per cent to the amount of 25,000,000 pesetas, it being stipulated that the value of such bonds shall be determined by the Government.

sterling, and shall not exceed

W. U. Buckley was a visitor in the city Tuesday.

The item regarding the raising of money for arms and ammunition is explained in the decree by the frank statement that the government has been unable to get money to make the necessary

payments. These are fixed at 6,400,000 pesos. Whatever amount is left available for the government must depend, in any case on its ability to sell bonds. It is assumed here that the holder of the packing company stock and the arms manufacturers have agreed to accept the bonds at 85.

Had Narrow Escape
Carl Gustavson, who lives at Prentice about 20 miles from here, was almost kicked to death by a horse last Saturday

As he was on his way to town in company with a friend, He was driving a team hitched to a farm wagon, spraining his ankle, and falling against the horses heels. It seems the team, which was very gentle, became frightened and began kicking, with the result that Gustavson

He was brought to the Berkeley Hotel Sunday where his wounds were dressed by Dr. Harris. He is getting along nicely and will be out in about a week.

Concession to Liverymen
The health committee of the city council held a meeting Monday and re-stated the schedule of prices so that the livery men will be able to dispose of the carcasses of the animals without violating the game law by shooting animals out of season, has appealed the case and it is being heard in district court at Gleichen.

Wanted to Purchase
I desire to purchase team of horses

of all garbage from theatres at a much lower cost. The former price charged for the disposition of such garbage by the incinerator was thought to be a little excessive by the livermen, so the new rate, which is only a charge of \$10 for 100 loads, \$7.50 for 50 loads and \$5.00

for 25 loads will probably be satisfactory to all.

BASSANO, ALTA., JANUARY 14, 1913

GETTING A GOOD START.

It is with just pride that The News now refers to the Bassano Board of Trade, for it is in every sense of the word a board of trade. On last Friday night, pursuant to arrangements at a previous meeting, the citizens of Bassano assembled at the City Hall for the purpose of perfecting an organization and for the election of officers for the year 1914. At this meeting there was a large attendance and a spirit of harmony prevailed.

A committee had been selected to prepare a set of by-laws for the new organization, and the work of this committee showed that great care had been taken in compiling same. The by-laws were read clause by clause, and adopted or amended, according to the judgment of the meeting. And with the adoption of the by-laws the meeting then proceeded to the election of officers, a proceeding in which all seemed very much interested.

J. S. Mavor, the brilliant young attorney of Bassano, was the unanimous choice of the assembly for the office of president. And no mistake was made in the selection of this gentleman for the place, as he is very capable and energetic.

L. Webster, a young business man of unquestioned ability and broad-mindedness, was chosen for vice-president. No better selection could have made for this place, as he is thoroughly acquainted with the work, having served in a similar capacity the past year.

Robert McLean was chosen as secretary-treasurer, and will no doubt make an ideal official.

With a splendid executive committee there is sure to be a bright future for Bassano.

The least that can be said is that the new Board of Trade was launched under very favorable conditions, and The News predicts an era of great improvement for the city of Bassano for the year 1914.

MR. BENNETT AND GOOD SPELLING.

To a deputation of educationalists waiting upon R. B. Bennett, M. P., that gentleman complained somewhat bitterly of pre-vocational training in schools, upon which the school board has launched with so much enthusiasm and promised success. He declared that the whole thing made him quite ill, which is most distressing. If the intelligent training of young men and young women in the practical work of life interferes with the health and well-being of our statesmen, we must pause for consideration. If the efforts of the school board are to have this deplorable and dangerous effect it is time to call in the health inspector again.

Mr. Bennett's illness seems to arise from the fact that his typewriters cannot spell. To get a stenographer who can do justice to his extensive vocabulary he is forced to violate the alien labor act and import stenographers from abroad, which must also be laid up against the Canadian school system. It not only endangers the health of our statesmen, but incites them to law-breaking, which is even worse.

The Albertan feels that Mr. Bennett has not made a very careful study of pre-vocational education. The aim of the promoters of pre-vocational education is to keep students who would leave school at an earlier age under other circumstances a little longer in the schools and to open up for them some features of the industrial world or domestic life in which they will soon enter. It is of as much importance, almost, that the schools should so hold the advanced pupils and that the girls should have some training in the duties of life as that they should be made competent stenographers for Mr. Bennett.

There are many good men who are not good spellers, even lawyers and members of parliament. If Geoffrey Chaucer, who was a successful man of letters, should get a position from Mr. Bennett as writer and bring his spelling with him, he would be kicked downstairs as a failure after taking the first letter. In various newspapers, such as the Toronto World and the Literary Digest, the spelling is modern and somewhat uncertain. They spell "through" by chopping off the last two and the fourth letters. Spelling is inherited rather than acquired. Good spelling runs in families. To be a bad speller is unfortunate but not disastrous.

But pre-vocational education does not stand in the way of good spelling.

It is rather unfortunate that at the very time when the school board is making such an effort to provide pre-vocational education, and is meeting with so much success that Mr. Bennett, the disciple of good and accurate spelling should arise up to remark that the pre-vocational education gave him a pain. He should look more carefully into the question.—Morning Albertan.

French motorboat with an engine of only forty horsepower is making a voyage around the world to make meteorological and astronomical observations.

EXPOSURE MEANS CURE.

Some Conservative journals are blaming Liberal newspapers for referring to the corruption which has disgraced every by-election since the Borden Government came to power with Hon. Robert Rogers as the "Minister of Buy-Elections." Is not such a position rather absurd?

Without exposure how can there be a remedy?

When the party which obtained power with electoral purity and prompt punishment of election wrongdoing as a main plank in its platform is guilty of such crimes as the promising of good roads money as a bribe in South Renfrew, the attempted Richelieu Marine Railway bribery, the Hochelaga impersonation and the Macdonald series of infamies, the Chateauguay corruption, when even a Tory faction fight such as took place in South Lanark cannot come off without each side accusing the other of using ten dollar bills as election arguments; when the government goes to such lengths as to interfere in the Antigonish by-election with an improper list of public works for that district, what is to be done but expose the government?

And when the government, led by Mr. Borden who promised a special officer to prosecute election offenses in order to secure speedy justice and purity of elections, exhausts every ingenuity of the law to prevent the hearing of election protests in Macdonald, in Chateauguay and other ridings, and then deliberately enters an election protest in South Bruce in the hope of causing a saw-off to cover the Chateauguay iniquities, are the Liberals to be blamed if they insist on exposing these festering corruptions which the present government has introduced into Canadian public life?

IS IT TO BE A GAGGED SESSION.

That sober Conservative organ, the Montreal Gazette, recently remarked that as Parliament is not to assemble till January 15, the government will be rather at the mercy of the Opposition in the matter of getting money to carry on the national services. Apparently the Montreal Gazette forgets that Premier Borden has prepared for exactly such a position of affairs by the adoption of the closure last session. The Gazette is probably Conservative enough not to approve of the wholesale use of the gag, especially with regard to national finances. Every Tory organ, however, during the past few days has gleefully announced that Mr. Borden intends to use the gag throughout the coming session and plans to put through his \$250,000,000 of estimates and such other parliamentary business as he may have within four or five and one-half months by choking off the Opposition every time they want to know too much. To get some Conservatism it is now necessary to go to the Liberal party.

January is now about half gone and no real winter as yet.

Calgary and Edmonton are having their troubles with the I. W. W's.

The tango is condemned by the churches of Paris. Good advertising for the tango alright.

Portugal succeeded this week in selling its provinces in Africa to Great Britain and Germany for 100 million dollars. The price of white elephants appears to be going up.

Calgary citizens are all wrought up over the oil prospects again. The Dingman, or Discovery well, is expected to spout oil at almost any moment.

The Calgary young lady school teacher who has joined hands with the I. W. W. bunch has not enhanced her standing in the community to any great extent by so doing.

Bassano now has a Board of Trade that means business. With harmony among the townspeople it is a cinch that much progress will be made during the year 1914.

With a united body of business men all working for Bassano there is going to be something happening during 1914. And that something is going to be a steady growth and development of the town. The battle cry has been sounded and already things are moving forward.

"Hell will hold both Woodrow Wilson and myself before I resign," says Huerta. We suspected all the time that hell would get Huerta, but hadn't included President Wilson in the tea party.

If the lady orator who is making volcanic speeches to the unemployed is a competent member of the public school staff, as we understand it, it would not only be foolish but tyrannical to think of interfering with her work in school. These are the days when we do not punish people for what they think, or even for what they say. This is a free country. Let it remain free.—Albertan.

The mayor of Edmonton declares that one commissioner will have to quit, and all the king's horses and all the king's men and the populace of Edmonton do not seem to be able to save him, plead and intercede as they may. The powers of an Edmonton mayor exceed those of the Czar of Russia, who is the next most powerful potentate to the President of the United States. Those three are nearly supreme.

EDMONTON LIBERALS HOLD ROUSING MEETING

The Edmonton Journal has the following comments on a recent meeting of Liberals on the south side:

"The old fighting spirit of the liberals of Edmonton is coming back. Two years ago in the midst of a political lull, the liberals of Edmonton were almost dead. They are now coming back to life and are now ready to renew activity in this city."

It is also showing evidences of doing all over the dominion. Last night in the south side liberal club some every chair was filled from shortly after 8 o'clock till quarter of an hour of midnight to hear current political issues—both provincial and federal—discussed by Hon. C. B. Mitchell, Hon. Wilfrid Laurier, J. M. Douglas, M. P. for the constituency, and Hon. Drouin Marshall, who made probably the most rousing and gripping speech of the evening after coming in from this on the 10:30 train. A. T. Mode occupied the chair and piano solo.

It is no longer necessary to get down on your hands and knees to clean and polish hardwood floors. Or to get on chairs to dust the tops of tall furniture, the tops of doors, etc. Or to crawl under the bed, or to move it, to clean under it. Or to sit on the stairs and dust the banisters one by one. All of this—the never-ending dusting—is now easily and quickly done with the

By A. A. Hassan, and excellent songs by Hayden Morris and David Jones were very much appreciated by the audience.

The chairman wished the members of the club and liberals of the city a happy new year and said that as liberals they found themselves in a most fortunate position both in provincial and dominion affairs. He hoped they would continue to advance the cause of liberalism and achieve even greater success in 1914 than 1913.

GOVERNMENT'S SINS OF COMMISSION AND OMISSION IN YEAR 1913

A retrospect of the year that has just ended must give very much more satisfaction to the Liberal forces than to the supporters of the Dominion government. It would be hard to find any year in the history of Canada when the government achieved less in a concrete way for the good of the Dominion, when it had done more to jeopardize the good name of Canada at home and abroad. It would be impossible to find any year in which a newly elected government could have so much accomplished in so short a time.

There has been but one real event in the political world during the year that has shown any substantial progress with the growing inequalities of the Canadian people. That was the formation by Sir Wilfrid Laurier of the Liberal and policy of free trade with a direct appeal to the masses of the people. In comparison with that evidence of constructive statesmanship the temporary and opportunistic of the present government must strike into insignificance. No more striking proof of Sir Wilfrid Laurier's leadership could be imagined than the government after the election of January 1913, and again in announcing that the cost of living demanded no investigation suddenly found plenty of money to spend, and appointed a commission—but appointed it in such a way as to insure a report to suit itself.

It has been a disastrous year for the government. It opened with Mr. Borden's emergency in full bloom. It has closed with the emergency of the cost of living. It has been a year in which the government has been forced to face the emergency of the cost of living. It has been a year in which the government has been forced to face the emergency of the cost of living. It has been a year in which the government has been forced to face the emergency of the cost of living.

While proclaiming a large surplus, Hon. Mr. White faced a treasury emptied by substantial expenditures and had to go to England to borrow between thirty and forty million dollars until he became so inebriated in his demands on the London money market that the financiers rebelled, Canadian credit became impaired, and the present government is compelled to pay out one more million than the last Liberal government.

The government announced it would spend \$10,000,000 on good roads. It failed to induce Parliament to accept this proposition because it was cunningly framed in the interests of the government rather than the roads, and was an invasion of provincial rights. Since then the Government has had the mortification of seeing its Highway Bill proposition criticized in Provincial legislatures, and heartily condemned by such representative bodies as the Dominion Grange and the Western Grain Growers' Association.

The year has seen the government force through Parliament a gift of \$15,000,000 to Mackenzie and Mann, despite determined Liberal opposition, and the Government has seen that gift condoned by its own followers as well as by Liberals throughout the country. It has witnessed attack upon the Civil Service with wholesale denials to make room for partisan friends. It has seen every problem which faced the government referred to commissions, until Hon. Mr. Foster scornfully declared as a public meeting that commissions were as plentiful as berries in the wilderness and that their expensive reports were simply shovels and forgotten.

The year has witnessed the imposing upon Parliament for the first time of the clause, by which the government is able to pay the Opposition and force upon the country any legislation it pleases, unless the Senate has the courage to prevent it.

The year has been especially memorable for the shameful neglect by Premier Borden of every promise he made before his election. He stood as the champion of the oppressed rights, but has had the mortification of seeing one of his leading supporters, Mr. H. B. Bennett, M. P., for Calgary, declare that unless the Premier would implement his ancient promises and give the Western Province control of their natural resources he would resign his seat.

There have been several by-elections during the year. They ended disastrously for the government. The infamous MacDonald by-election, scandalous cloud with disgrace to the government in the confession of corruption by the man who headed, and the winning of his election without the government supporters daring to face a trial.

Despite every effort of the Conservatives they have lost prestige in the great stronghold of Ontario. They lost South Bruce after a determined campaign, and only succeeded in retaining their seats such as East Middlesex, by greatly reduced majorities. Their victory was in Chateauguay where they succeeded in gaining the riding by such corrupt methods that after the election was protested they employed their most expert lawyers to delay the election trial so that Mr. Morris could follow the example of Mr. Morrison in Macdonald and enjoy at least one more year in office before the courts voided his election.

The year has witnessed the complete collapse of the Bureau of the secret alliance between the Tory Centralists of Ontario and the Nationalists of Quebec by which the money of the Ontario half-wit interest was used to promote Borden propaganda in Quebec in order to defeat Sir Wilfrid Laurier, and in the end, to nothing for Imperial defence. On the other hand the year has witnessed steady progress on every side by the Liberals. Throughout the parliamentary session they fought successfully for the rights of the people, for the rights of Canada as an autonomous nation within the Empire. It has witnessed an extraordinary revival of Liberalism throughout the country as shown by the triumphant reception accorded Sir Wilfrid Laurier whenever he visited Ontario and the great meeting which have been held in the Western and Maritime Provinces, in the general, meeting of the Ontario Reform Association was the most enthusiastic ever held.

The year has seen the Liberal star in its natural position as leader of the Canadian people, opening the way to their reform and progressive legislation for the revival of prosperity and reduction of the burdens which have so increasingly weighed upon the people during the period of Tory administration.

HOW TO AVOID COLD

WEATHER DISEASES

To prevent cold weather diseases, put your body into a proper healthy condition to successfully resist them. Colds, grippe, bronchitis, pneumonia, diphtheria, typhoid fever, rheumatism and other ailments may be escaped in most cases, if this is done. Build up your health and strength—your nerves and blood and ensure body—into such shape that you can count on good health all during the winter months—by taking Rosall Olive Oil Emulsion, the ideal blood, nerve and body builder.

This is a remarkable medicine, but a common-sense one. It doesn't stimulate. So-called "tonics" that stimulate give you no permanent relief; but leave you weaker than before. Rosall Olive Oil Emulsion contains none of those harmful stimulating ingredients, such as alcohol and dangerous and habit forming drugs. Its great benefit to you is through its real nerve and blood and body building effects. It nourishes, builds, strengthens. Its merit does not rest on making you feel better for a few minutes at a time after taking it, but on making you feel better as a result of making you well.

Rosall Olive Oil Emulsion is the ideal blood and nerve-food tonic. You who are weak and run down, and who are apparently well now, but are liable to suffer from various cold weather ailments, use Rosall Olive Oil Emulsion to get and keep well and strong. For the tired-out, nervous, nervous, muscular or debilitated—the convalescing—growing children—and people—it is a sensible aid to renewed strength, better spirits, glowing health.

Keep well and strong. For the tired-out, nervous, muscular or debilitated—the convalescing—growing children—and people—it is a sensible aid to renewed strength, better spirits, glowing health.

Rosall Olive Oil Emulsion—king of the celebrated Rosall Emulsion—if far from you from sickness of you and your family. You'll be as enthusiastic about it as we are when you have noted its pleasant taste, its strengthening, invigorating, building-up, disease preventing effects. If it does not help you, your money will be given back to you without argument. Sold in the community only at our store—The Rosall Store—one of more than 1,000 leading drug stores in the United States, Canada and Great Britain—St. Louis, Mo., Rosall, Ala.—Adv.

GOVERNMENT IS FORCED TO ACT

But Cost of Living Commission Has a "Joker."

The high cost of living and excessive taxation are two subjects which the present government dislikes to discuss. The more Sir Wilfrid Laurier and the Liberal leaders demonstrate that these are the two pressing public questions in Canada today, the more do the Conservative leaders try to bury their heads in the sand and pretend that there is no need of discussing such vital questions as the inordinate cost to the common people of merely existing alive.

When Sir Wilfrid Laurier announced the Liberal policy of free food and reduced taxes with a serious inquiry into the high cost of living, the inspired conservative press belittled the matter and intimated that the government was so wedded to high tariff stability that it would not consider any inquiry. Hon. Mr. Cuthbert replied for a few years of hard times to reduce prices. Hon. Mr. Foster declared that Canada was already overburdened with commodities, and that the government merely pigeon-holed most of their reports after paying heavy expenses. Hon. Mr. Rogers said "No Commission." Nothing could be further from the mind of Premier Borden and his colleagues than a commission to inquire into the cost of living.

They found, however, that the public thought otherwise. The general approval which greeted the Liberal policy filled them with dread. The result once more intimated that their head of the government or leader of the opposition, Sir Wilfrid Laurier was the real leader of the Canadian people. Suddenly the Government changed its ideas, and announced with a flourish of trumpets that a commission would be appointed to inquire into the cost of living.

BET SUGAR FACTORY FOR BASSANO

Would Mean a Great Deal For Town and Will No Doubt Be Built

A. L. Fryberger, in an interview for an eastern newspaper, recently, laid something to say with regard to the beet sugar industry and what can reasonably be expected by the farmers in the irrigation district around Bassano. Mr. Fryberger is an experienced beet grower from the state of Colorado, and knows just what he is talking about. The beet sugar industry in this section as a beet producing and is going to be instrumental in bringing many good farmers to Alberta.

"I moved up to Bassano early this spring," he says, "after nine years in sugar, which is a very high grade. Irrigation is an essential to successful cultivation. Situated as we are in the eastern section of the C. P. R. irrigation system, which has only just been opened for settlement, we have not yet had the water turned on in the ditches, but with the cost to the common people of merely existing alive, we shall have an abundant supply."

"My crop averaged 16 and 18 per cent sugar, which is a very high grade. Irrigation is an essential to successful cultivation. Situated as we are in the eastern section of the C. P. R. irrigation system, which has only just been opened for settlement, we have not yet had the water turned on in the ditches, but with the cost to the common people of merely existing alive, we shall have an abundant supply."

To the Public

We wish to thank our friends and patrons for the liberal support which they have given us during the short time we have been in the business, and solicit your patronage in the future.

We do no hocking—our work speaks for itself. Ask our customers.

The fact that my experiment with beets has been so successful without irrigation should be satisfactory evidence of what can be done with irrigation.

"These are very extremely profitable crops. With proper cultivation from ten to twelve tons per acre can be grown easily. Indeed, some of the boys who came up as the result of my recommendation conservatively estimate their crop as from twelve to fifteen tons. Beets add fertility to the soil, too, instead of robbing it, and the tops of the plants have in many cases a commercial value of roughly \$3 per acre for feed."

"The labor problem is the most serious obstacle. There is so much hard work required that the farm of labor is very scarce, but then, on the other hand, consider that in the town I came from in Colorado, which is about the size of Bassano, the factories are distributing approximately \$40,000 every fortnight to the farmers, which is a great thing from the economic standpoint."

"The best harvest is somewhat later than the grain harvest, so that they would not clash with the labor shortage in most sections. Beets are practically non-freezing, so that the advent of winter soon after the conclusion of grain threshing does not affect them at all."

Mr. Fryberger says he is going to keep after this little bunch of Colorado settlers until they produce enough sugar beets to justify the erection of a sugar factory either in the locality or in some nearby city. He thinks that when transportation facilities between the colony and the town of Bassano—which is fifteen miles distant—are improved every man should have from twenty to forty acres of beets in every quarter section.

"Beets and alfalfa will be the making of Alberta," is his opinion. His town farm produces so much alfalfa per acre as his former more expensive land in Colorado. Owing to difficulties with the irrigation system in that state some who a few years ago were raising \$100 an acre for their land are today glad to take \$25 to \$30.

"The water here looks good to us," he says in conclusion. "We are all irrigation farmers, and can claim to be regarded as expert users of irrigation; and we have a system that is as near perfect as possible. In making up our part great pains were taken to select men who were acquainted with the principles of irrigation farming, and for the special purpose of increasing the utilization of beets."

APPLE DESSERTS

There is a generally accepted idea that the apple is a distinctly American, but the cooks of other countries than our own appreciate the many possibilities of this fruit to the full. In the following are some of the country. Here are a few of the really delicious ways in which apples may be made into desserts:

Apple Croquettes.

Peel, quarter and core a dozen of cooking apples. Slice them into thin, round, half-inch thick, round, flat butter, the rind of a lemon and the fourths of a cupful of sugar. Cook in a little water, stirring constantly to prevent scorching; then add the beaten yolks of four eggs and two tablespoons of rice flour or cornstarch. Cook until the mixture is well stirred, stir a few minutes longer, press through a sieve. Spread on a buttered platter and allow to cool. Stir turn out on a board with a spatula with fine dry bread-

Baked Apples a la Bourdoise. Pare, remove the cores and cores of the cooking apples in half. Place in a shallow baking dish. Add juice of two lemons and some powdered sugar and pour over them some melted butter. Heat them thoroughly over the fire until the apples are done to finish cooking. Arrange in a pyramid form in a glass dish or in a paper serving dish and cover with

Apples a la Windsor.
Cook and core a dozen medium-sized apples. Sprinkle with sugar with a cut lemon to keep it white, then in thin sugar syrup until tender, but not broken. Drain on a wire. Fry some croquettes and spread a smooth layer about half an inch thick on a plate. Sprinkle with powdered sugar. Place the apples a light brown then with a small sized biscuit cut out rounds of rice and arrange in a flat baking dish. Sprinkle with sugar on each round and in the cavity in each apple with orange marmalade. Dot the top with currants. Reduce the sauce to a syrup and pour over the apples. Serve them with whipped cream.

DIQUE SHIRTS.
THE newest shirts to wear with sponge skirts are those in the new pique is only a distant relative to the stiff pique of other years. The shirt is made in cut, with exception of the neck, which is in the usual form, one of the best of the rolling collar, which owe their origin to the days of Mary Stuart. Correct finishing touches are secured by the use of a steam iron. The collar is adjusted. No matter how severe the shirt and skirt may be, the bath is sure to give feminine touch.

AN ADVANCED MODEL.
OF smoke gray bedford cord, this would be inconspicuous were it not for the rather astonishing width

SUIT OF GRAY BEDFORD CO

at the hip and waist line of the coat one end depending below the skirt.

"This suit by a French couturier shows the longer coat promised to fall and a skirt short enough to a neat buttoned walking boot. The sleeve is oddly set into the shoulder of the coat."

SWEET POTATO SALAD.
BOIL three large sweet potatoes in dice. Cut two stalks of celery into very small pieces, season with salt and pepper and pour over salad dressing.

THE VANISHING POINT.
WITH no allits in the skirts this time it is to be presumed that it will be a slump in the series silk coat market.

A dark, grainy, black and white photograph showing a close-up of a textured surface, possibly a wall or ceiling. The upper portion is dark and mottled, while a bright, horizontal strip runs across the bottom, suggesting a light source or a different material edge.

GIRL OF EIGHT PROVES SHE KNOWS TRUTH

Tells Judge in Action for \$10,000 She Fears God More Than Jail

Brooklyn, N. Y.—"Do you know what an untruth is?"

"Yes," replied Corinne Oswald, eight years old, on the witness stand in the United States District Court here.

"I once told an untruth. I found a nickel and spent two cents for candy and told my mother I found only three cents. That was a long time ago, and after it had worried me I told my mother the truth and she forgave me."

Through her parents, who live at No. 62, East Nineteenth Street, Whitestone Landing, the girl sought \$10,000 damages from the Kleinknecht for conspiracy for injuries from being hit by a wagon.

"What will happen to you if you tell a lie under oath?" Judge Fowler asked the child.

"I'll be punished."

"Is what way?"

"I'll be put in jail and God will punish me."

"Do you fear God or jail the most?"

"God," replied Corinne quickly.

Judge Fowler decided that she understood the responsibility of an oath and permitted her to testify. The jury, which was out several hours, disagreed.

MERCURY LOWEST

FOR FORTY YEARS

Montreal, Jan. 14.—Not since 1875, nearly 40 years ago, when McGill university started to make meteorological observations, has there been so low a temperature registered in Montreal as was recorded Tuesday.

At 7 o'clock Tuesday morning the mercury had dropped to 27.1 degrees below zero. The lowest cold-streak previously registered was January 24, 1889, when it was 26.0 below.

VANCOUVER WILL PROBABLY RAISE ASSESSMENT

Vancouver, Jan. 14.—Mayor Baxter is complaining bitterly at the failure of the assessment commissioners of Vancouver to properly increase the assessment. The tax rate in Vancouver will this year probably have to be slightly raised. Alderman Crowe, chairman of the board of works, thinks it inevitable that the city go back soon to the plan of a partial tax on improvements. Other members of the council are against this, so the chance is that the so-called single tax system will be continued in Vancouver just as long as possible. The mayor thinks it an excellent advertisement. He thinks it would be a better advertisement if the assessment were raised so that a tax rate of, say, 14 mills would produce the same revenue as the proposed rate for this year of 21 mills. The assessment of this year over last is less than \$8,000,000, which the mayor thinks is ridiculous.

MONTREAL'S LOSS BY FIRE IS REPORTED AT \$250,000

Montreal, Jan. 14.—Fire invaded the crowded downtown district Tuesday afternoon and gutted the seven-story building near the corner of St. Paul and Place Royale, owned by the Benoit family. It is believed and caused by the wholesale hardware firm of Frothingham and Workman. Intense cold weather conditions added to the fact that the blaze was right in the heart of the congested warehouse district, made the task of the firemen doubly difficult.

The fire, which is said to have been caused by the upsetting of a plumber's lamp in the shipping room on the ground floor, quickly spread upwards through the other floors. The firm employs about 80 persons, twenty or so of them being girls. All got out safely. Another damage.

to the fire fighters was the presence of the building of a considerable quantity of ammunition, but a large part of this was contained in a fire proof vault that escaped injury. Upon the top of the tower, were a number of cases of cartridges and no longer after the fire started than commenced to explode.

PREMIER BORDEN MAY VISIT WEST DURING SUMMER

Ottawa, Ont., Jan. 14.—Premier Borden will in all probability, will take a trip through the west after the session of parliament. He has not made any definite plans yet, but it is understood that he has secured some of his western friends that he will endeavor to visit that part of the country next summer. He has not been west since his political tour in the general elections of 1911. That trip required a month, but was in the heat of a strenuous campaign, when he had not a proper opportunity to see the country or get into touch with its varied interests.

YOUR HAIR MAY BE YOUR FORTUNE

Beautiful hair has made the fortune of many a woman by adding charm and brightness to the otherwise plain face, making women more to look like than beautiful hair. It adds to the attractiveness of every feature. Without it you can't be beautiful; with it you will be at least pretty.

To have beautiful hair, use Harmony Hair Dressing. It will improve the texture of your hair, taking away the dull barbedness and stringiness, softening and conditioning every hair in your head and making it soft, silky, glossy, easier to put up and keep in place and at the same time giving it a rich and lasting rose fragrance that will delight both you and those around you.

Very easy to apply—simply sprinkle a

DAHLER AND PLUMER.

SYNOPSIS OF CANADIAN NORTH-WEST LAND REGULATIONS.
The new land of a family, or any other, over 18 years old, may homestead a quarter-section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Land Office, or by proxy, before the District Surveyor by proxy, and the office of any Local Agent of Dominion Lands (not sub-agent).

Duties—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within five miles of his homestead on a farm of at least 40 acres, on certain conditions. A homestead is required in every case. Duties—Six months residence upon and cultivation of the land in each of three years from date of homestead entry (including the time required to earn homestead interest) and 50 acres extra cultivation. The area of cultivation is subject to reduction in case of illness or other satisfactory land after report by Homestead Inspector on application for final title.

A homesteader who has exhausted the homestead right, and cannot obtain a second in certain districts, may, at the discretion of the Department, acquire in each of three years, cultivate 50 acres and erect a house worth \$250.
